

## THE PROJECT

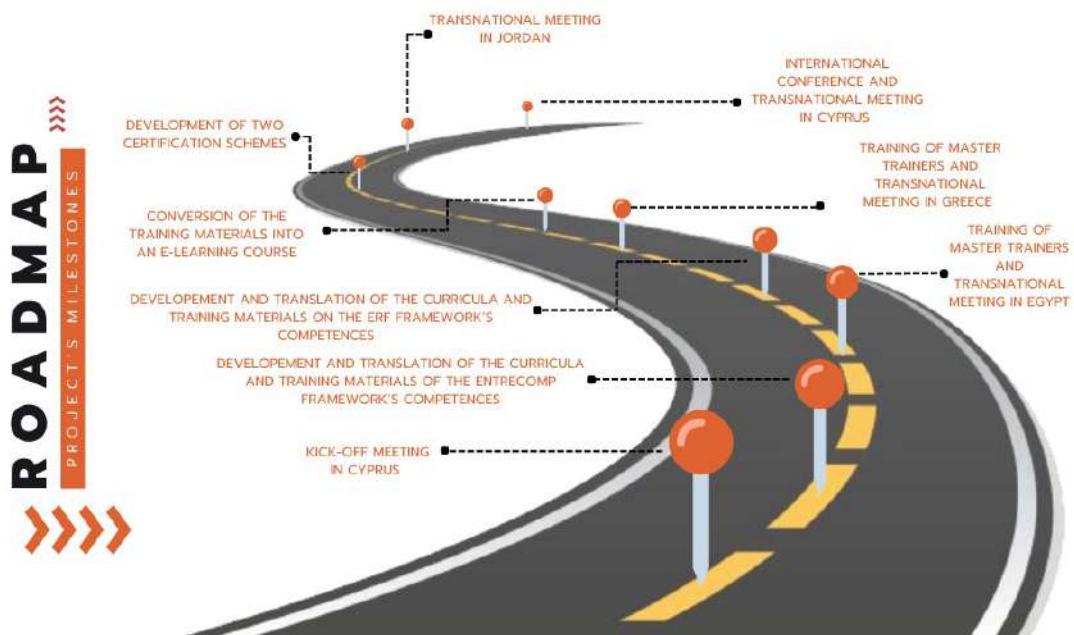

EMSA is an Erasmus+ co-funded project that will last 3 years. It aims to empower learners and entrepreneurs by providing them with 2 training programmes:

- Entrepreneurial Mindset Skills based on the Entrepreneurship Competence Framework (ENTRECOMP).
- Key Skills for Lifelong Learning based on the European Reference Framework (ERF).

Both programmes will lead to ISO17024 qualifications based on assessment tools that will be developed during the project and will be used by the learners. The training materials will be aligned with Level 5 of the European Qualification Framework (EQF) to equip youth and other participants in the programmes with significant key and entrepreneurial competencies and enhance their employability.

## OBJECTIVES

- 1 Develop curricula, training materials, and methodological tools for trainers that design, develop, implement, and evaluate online trainings.
- 2 Develop digital assessment tools through which trainers will be able to take assessments and achieve ISO17024 qualifications.
- 3 Develop a digital resource and networking tool (platform) for trainers to use to better lead online learning journeys.
